
What is Somatropin?

Somatropin, also called HGH or human growth hormone, would be better named the Rejuvenation or Anti-Aging Hormone. Somatropin (HGH) is secreted by the pituitary gland, effecting almost every living tissue in the body. It is directly responsible for stimulating tissue repair, cell replacement and brain function. It has positive effects on immunity, energy and metabolism.

Somatropin promotes the burning of fat while increasing muscle mass, restoring skin thickness, elasticity, smoothing wrinkles, rejuvenating hair and nails, promoting deeper sleep, improving sexual performance and pleasure.

Why Increase Somatropin Levels?

Clinical evidence demonstrates that by increasing Somatropin (HGH) we can dramatically reverse many negative health symptoms that develop with aging.

Produced abundantly in our youth, HGH declines approximately 80% from ages 20 to 60. By increasing HGH levels in the body, science tells us that we can rejuvenate almost every cell in the body, including skin, bones, muscles and organs, to their former youthful levels.

How it Works

Renew-All utilizes a proprietary transdermal delivery system featuring breakthrough liposome technology. Billions of tiny microscopic time-released "bubbles" are filled with safe homeopathic rHGH, ATP and L-Dopa for direct absorption through the skin, into the body.

Suggested Usage: Apply 1/4 to 1/2 teaspoon to thin-skinned vascular areas (inner arms and wrists, behind knees, upper chest, around neck and face) in the morning and evening. Apply to each area regularly. Rub in Completely. Or as directed by a healthcare professional.

For adult use only, keep away from children. If pregnant or nursing, please consult your health care professional before use.

No human products or by-products are used in the manufacturing. No animal testing.

Renew-All - Transdermal Somatropin Cream

Rejuvenates Cells & Tissue

Why Renew-All?

Renew-All is part of a remarkable new generation of anti-aging health supplements designed to improve the quality of your life, fighting back the negative symptoms associated with aging.

Somatropin (HGH) levels are very high in our youth, keeping us energetic and healthy. Studies show that an aging person exhibits much lower levels of somatropin than a younger person. Over time this decreased somatropin level has significant negative effects on fat deposition, disease immunity, energy levels and overall health.

New technology has succeeded in producing recombinant Somatropin (rHGH) in a safe homeopathic cream.

Beneficial to the aging body as well as to the fitness oriented, homeopathic

somatropin was designed to optimize energy levels, increase endurance, strengthen the immune system and alleviate joint stiffness. Somatropin (HGH) exerts anabolic effects throughout the body favoring the tissues, bones and muscles. HGH also assists in the development of lean body mass and muscle strength.

HGH and IGF-1 helps your DNA repair itself prior to cell division. HGH initiates the transport of amino acids and nucleic acids into the cell. IGF-1 facilitates the transport of nucleic acids into the nucleus of the cell where the DNA resides, giving it the raw materials needed to repair damage to the DNA and initiate cell division.

Renew-All contains ATP, which transports chemical energy within all cells for metabolism. ATP performs many essential roles, including regulating many biochemical pathways and is used in the synthesis of RNA and DNA within the cell.

Mucana Pruriens herbal extract is a natural source of L-Dopa, an effective dopamine stimulator. L-Dopa is the world's most extensively researched amino acid and has been used over the past 30 years. L-Dopa converts into Dopamine, a very powerful neurotransmitter that stimulates the hypothalamus and pituitary glands to release your own HGH. Dopamine also regulates motor control, sex drive, immune function,

fat loss, lean muscle gain, bone density, energy levels and the ability to sleep soundly.

Renew-All is a potent synergistic formula that combines natural homeopathy with safe powerful herbal extracts for healthy support of your HGH levels.

Active Ingredients: 5% Somatropin (HGH) in IOx, 30x and 100x potencies, IGF-1 30x, Pituitary Extract 30x, Triple Strength Mucuna Pruriens Extract, Adenosine Triphosphate (ATP).

Hormones do not decline because we age – we age because hormones decline
